

## IMPORTANCE OF COMMUNITY OUTREACH INITIATIVE IN SCHOOLS

The 21<sup>st</sup> century education is no longer confined to the portals of a school. It's evolving into a collaborative endeavor in which schools proactively work towards social and environmental transformation. Seth Anandram Jaipuria Group of Schools undertakes regular community outreach initiatives to usher in positive change in society. We have adopted schools and villages to promote sports, and forged stronger community connect through programmes that involve children and members of socially and economically disadvantaged groups. Through SMILE Foundation we sponsor education of children from underprivileged communities. We conduct programmes to let children from nearby communities access the state-of-the-art facilities in our schools to nurture in them important skills and competencies. Every year, our schools take up tree plantation activity on a large scale towards environmental preservation. Among our most significant community outreach is the training in ICT of 10,000 teachers of Uttar Pradesh government schools. Each one of our community outreach initiatives is aimed at facilitating nation-building with a view to contribute to India's emergence as a developed nation in the years and decades ahead.

## SCOPE OF COMMUNITY OUTREACH PROGRAMS IN SCHOOLS

Inequalities and deprivations exist in every area of the society. Interweaving Community Outreach Program along with Core Academic Transaction today is an essential component of the students' holistic development. Seth Anandram Jaipuria School, Kanpur, has successfully created several Community Outreach Programmes. The school runs an Afternoon School for close to 200 students from the underprivileged section of the society. This school is run by the teachers and senior students of the school. The school is one of the first schools of the city to be permitted to establish an Atal Tinkering Laboratory. Seth Anandram Jaipuria School,

The dynamics of the world are getting rather interesting today. Busy lives, nuclear families, and the disparities between the rich and the poor have resulted in a self-centered approach where apathy rules the order of the day.

As a community that comprises the schools, the parents, and the students we must engage in effective and productive outreach through book donations, adopting schools or slums, forming Robinhood armies, organizing blood donation camps, etc. Children do what they see their adults doing; hence if they see their parents, teachers, and every other adult engaging in philanthropy they would definitely grow up being empathetic and happy adults, living in a happy community.

**MS. POONAM KOCHITTY**  
Principal  
Seth Anandram Jaipuria School,  
Shaheed Path, Lucknow

Apart from academic rigour in schools, children must be encouraged to understand their role in the progress of others, especially the less privileged.

Adopting regular visits to old age homes, orphanages and donating clothes, blankets, food grains, medical supplies, can go a long way in supporting these social charitable organizations. The Children learn compassion and empathy.

Donating books and notebooks, story books, stationary, supporting the education of children through small monthly contributions can make a huge difference. Such outreach programmes must have a concrete plan to make it a sustainable practice that will have long term impact.

**MS. ANJALI BAJPAI**  
Principal
